## **DETAILED ACTION**

## Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1-8, 10, 23, and 24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Smith (US 6,655,199) in view of Kolberg (EP 0469283).

Smith teaches the use of a drive-by-wire assembly for a motor vehicle comprising, in combination; a pedal (10) configured retain its original shape and undergo no substantial deformation when engaged by a foot of a user (see Fig 1), and an electronic control unit (30) configured to receive an output signal and provide a control signal (col. 2 lines 47-63).

Smith discloses the device as described above, but does not disclose a strain gauge secured to the pedal and configured to provide an output signal based on a force applied to the pedal by a foot of a user (Smith teaches that the sensor 24 may be any suitable stress sensor and that it is responsive to the strain in the pedal arm).

Kolberg teaches the use of a strain gauge secured to the pedal and configured to provide an output signal based on a force applied to the pedal by a foot of a user (abstract).

Application/Control Number: 10/814,560

Art Unit: 3682

It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the assembly of Smith to include a strain gauge as taught by Kolberg in order to increase reliability (col. 1 see Advantages).

Re claim 2, Smith shows the pedal is an accelerator pedal (col. 1).

Re claim 3, Smith shows the pedal is a brake pedal (col. 1).

Re claim 4, the pedal is a clutch pedal (well known).

Re claim 5, Smith shows the pedal comprises an arm (18) having a first end and a second end, and a footpad (20) secured to the first end, the second end being secured to a mounting member (28).

Re claim 6, Smith shows the mounting member is configured to be secured to a front of dash of a vehicle (see Fig 1).

Re claim 7, Smith shows the strain gauge is secured to the arm of the pedal (see Fig 1).

Re claim 8, Kolberg teaches the strain gauge is secured to the mounting member (see Fig 4).

Re claim 10, Kolberg teaches a false feedback member (31) connected to the pedal and configured to provide resistance to foot of a user, the strain gauge being secured to the false feedback member (see Fig 6).

Application/Control Number: 10/814,560

Art Unit: 3682

Re claim 23, Smith teaches the control signal is transmitted to a throttle assembly (col. 2 lines 60-63).

Re claim 24, Smith teaches the control signal is transmitted to a brake system (col. 2 lines 54-57).

## Response to Arguments

3. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

## Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
